LIST OF CONTENTS

NUMBER 1

R. Caron Cooper and **Lee Schipper**	1	The efficiency of energy use in the USSR—an international perspective
B. W. Ang and **T. T. Ng**	25	The use of growth curves in energy studies
B. W. Ang, T. N. Goh and **X. Q. Liu**	37	Residential electricity demand in Singapore
Loren Lutzenhiser	47	A cultural model of household energy consumption
Antonio M. Borges and **Alfredo M. Pereira**	61	Energy demand in Portuguese manufacturing: a two-stage model
Sibel Özdoğan and **Mahir Arıkol**	79	Effects of SO_2 emission regulations and fuel prices on levellized energy costs for industrial steam generation options
N. Al Mahdi	87	Performance prediction of a multi-basin solar still
E. Taşdemiroğlu	95	Air pollutant emissions due to energy utilization in Turkey

NUMBER 2

Jesse S. Tatum	99	The home-power movement and the assumptions of energy-policy analysis
Chi-Keung Woo and **Roger L. Pupp**	109	Costs of service disruptions to electricity consumers
M. K. Drost, Z. I. Antoniak, D. R. Brown, and **S. Somasundaram**	127	Central station thermal energy storage for peak and intermediate load power generation
Hashem Akbari and **Haider Taha**	141	The impact of trees and white surfaces on residential heating and cooling energy use in four Canadian cities
Lawrence J. Hill, Eric Hirst, and **Martin Schweitzer**	151	From DSM technologies to DSM programs: issues in demand-side planning for electric utilities
Stig-Inge Gustafsson	161	Optimization of building retrofits in a combined heat and power network
M. A. Hamdan and **B. A. Jubran**	173	Thermal performance of three types of solar air collectors for the Jordanian climate
R. D. Palumbo, M. B. Campbell, and **T. H. Grafe**	179	High-temperature solar thermal processing Zn(s) and CO from ZnO(s) and C(gr) using Ti_2O_3(s) and TiO_2(s)

Victor D. Phillips, Andrei V. Chuveliov, and Patrick K. Takahashi 191 A case study of renewable energy for Hawaii

Note
S. Scesa 201 Energy conservation in cupola operation

NUMBER 3

Aurora A. Kawahara and Peter M. Williams 205 An application of Dempster–Shafer theory to the assessment of biogas technology

L. Schipper, R. Howarth, and E. Carlassare 215 Energy intensity, sectoral activity, and structural change in the Norwegian economy

Radu Zmeureanu 235 A new method for evaluating the normalized energy consumption in office buildings

A. Therdyothin, S. C. Bhattacharya, and M. Tabucanon 247 Evaluation of alternatives to increase the electrical generation capacity of Thai sugar mills

Denis Mollison and M. T. Pontes 255 Assessing the Portuguese wave-power resource

Ho-Ming Yeh and Zhi-Fang Chen 269 Experimental studies on wick-type, double-effect solar distillers with air flow through the second-effect unit

Won-Yong Lee and Sang-Soo Kim 275 The maximum power from a finite reservoir for a Lorentz cycle

M. A. Habib, F. M. El-Mahallawy, A. H. Abdel-Hafez, and N. Naseef 283 Stability limits and temperature measurements in a tangentially-fired model furnace

M. A. Habib and S. M. Zubair 295 Second-law-based thermodynamic analysis of regenerative-reheat Rankine-cycle power plants

A. Tamimi and B. Z. Uysal 303 Drying characteristics of oil shale

Note
T. V. Natarajan and S. Ramani 309 Generation of electricity using a pair of oxen

NUMBER 4

P. H. Wallman 313 Coproduction of oil and electric power from Colorado oil shale

Robin Miles-McLean, Michael Shelby, Clarisse Lula, Michael Sagan, and Kenneth E. Train 321 Comparison of forecasts from aggregate and disaggregate models for personal vehicle energy consumption and CO_2 emissions

Hamdy M. Shafey and **I. S. Taha** 331 Experimental study on a bench-scale, batch-type fluidized-bed combustor for energy production from waste-derived fuels

M. A. Rosen 339 Evaluation of energy utilization efficiency in Canada using energy and exergy analyses

Quanlu Wang and **Mark A. DeLuchi** 351 Impacts of electric vehicles on primary energy consumption and petroleum displacement

Franz Wirl 367 Impact on world oil prices when larger and fewer producers emerge from a political restructuring of the Middle East

Eckhard Plinke, Mehmet Atak, Hans-Dietrich Haasis, and **Otto Rentz** 377 Cost-efficient emission control strategies for the Turkish energy system

Lin Wenxian and **Lu Enrong** 397 Parameteric studies of thermosyphon solar water systems with electric heaters

Sanjay Kaul and **Qian Liu** 405 Rural household energy use in China

Note

A. Prasad and **J. Nandi** 413 A transient, conjugated, conduction-controlled, sensible-heat storage

NUMBER 5

John Haraden 419 An improved shadow price for CO_2

Frank Kreith 427 Solid waste management in the U.S. and 1989–1991 state legislation

E. D. Rogdakis and **K. A. Antonopoulos** 477 Performance of a low-temperature NH_3–H_2O absorption–refrigeration system

M. A. Habib 485 Thermodynamic analysis of the performance of cogeneration plants

A. R. Rao, D. S. Nehra, D. P. Singh, and **M. S. Kairon** 493 Energetics of cotton agronomy

Jože Renar and **Miha Tomšič** 499 Optimal electric power conservation investments using utility avoided-costs

Alan Meier, Leo Rainer, and **Steve Greenberg** 509 Miscellaneous electrical energy use in homes

Note

Ali B. Cambel and **John E. Mock** 519 Iterated function systems for geothermal energy exploration

NUMBER 6

A. Ianetz and **A. I. Kudish**	523	Correlations between values of daily beam, diffuse and global radiation for Beer Sheva, Israel
Sibel Özdoğan and **Mahır Arıkol**	535	Solar, industrial process-heat applications in selected Turkish industries
John Haraden	547	The status and potential development of magma power
Sayed Aqa and **S. C. Bhattacharya**	575	Densification of preheated sawdust for energy conservation
S. C. Saxena, N. S. Rao, V. G. Rao, and **R. R. Koganti**	579	Coal combustion studies in a fluidized-bed test facility
N. Egrıcan and **A. Yıgıt**	593	Simulation of an absorption cooling system
V. Bădescu	601	Optimum operation of a solar converter in combination with a Stirling or Ericsson heat engine
R. Calderan, M. Spiga, and **P. Vestrucci**	609	Energy modelling of a cogeneration system for a food industry
T. F. Arıcan and **Ö. Hortaçsu**	617	Energy conservation in glass manufacture
Note		
T. R. Sivaramakrishnan	625	Wave power over the Indian seas during the southwest monsoon season

NUMBER 7

B. W. Ang, T. T. Ng, and **T. F. Fwa**	629	A factorization analysis of automobile fuel consumption in actual traffic
Eric Hirst and **Carol Sabo**	635	Defining and reporting data on utility DSM programs
Ru Yang and **W. J. Yan**	649	Simulation study for an open-cycle absorption solar-cooling system operated in a humid area
Patrick K. Takahashi and **Andrew Trenka**	657	Ocean thermal energy conversion: its promise as a total resource system
Sanjay Agrawal and **K. C. Midkiff**	669	Model predictions of the extent of heterogeneous coal combustion during rapid evolution of volatiles
B. W. Ang, X. Q. Liu, and **H. L. Ong**	679	Sector disaggregation and the effect of structural change on industrial energy consumption
X. Q. Liu, B. W. Ang, and **H. L. Ong**	689	Interfuel substitution and decomposition of changes in industrial energy consumption
Ho-Ming Yeh	697	Theory of baffled solar air heaters

C. Choudhury and H. P. Garg 703 Thermal performance of a solar hybrid domestic hot water system

Kenneth E. Train 713 An assessment of the accuracy of statistically adjusted engineering (SAE) models of end-use load curves

Masood A. Badri 725 Analysis of demand for electricity in the United States

NUMBER 8

Peter H. Gleick 735 Environmental consequences of hydroelectric development: the role of facility size and type

Moshe Levy, Rachamin Rubin, Hadassa Rosin, and Rachel Levitan 749 Methane reforming by direct solar irradiation of the catalyst

Ananias de Almeida Saraiva Pontinha, Ricardo Antonio de Arruda Veiga, and Alcides Lopes Leao 757 Charcoal production using tropical pine thinnings

William J. Carmody and John Haraden 761 An electric grid for transportation in Los Angeles

Syed M. Zubair, Anwar K. Sheikh, and Mohammed N. Shaik 769 A probabilistic approach to the maintenance of heat-transfer equipment subject to fouling

John Haraden 777 The status of hot dry rock as an energy source

C. D. Rakopoulos 787 Olive oil as a fuel supplement in DI and IDI diesel engines

Willem van Gool 791 Exergy analysis of industrial processes

Note

Kenzo Saikawa 805 Recent oil imports into Japan

Corrigendum 807

NUMBER 9

Leif Gustavsson, Bengt Johansson, and Helena Bülow-Hübe 809 An environmentally benign energy future for Western Scania, Sweden

Dennis M. Keane and Chi-Keung Woo 823 Using customer outage costs to plan generation reliability

Soon-Haeng Cho and Jong-Nam Kim 829 Modeling of a silica gel/water adsorption–cooling system

Roberto Schaeffer and **Robert M Wirtshafter** 841 An exergy analysis of the Brazilian economy: from energy production to final energy use

G. R. Hadder 857 Future refining impacts of the clean air act amendments of 1990

Bharati Joshi, T. S. Bhatti, and **N. K. Bansal** 869 Decentralized energy planning model for a typical village in India

A. E. Abasaeed 877 Briquetting of carbonized cotton stalk

NUMBER 10

S. S. Penner, J. Haraden, and **S. Mates** 883 Long-term global energy supplies with acceptable environmental impacts

Reiner Kümmel 901 Opportunity costs of CO_2

S. Pokharel, M. Chandrashekar, and **J. B. Robinson** 907 Interfuel and intermode substitution for cooking

Edward L. Vine 919 Free rider estimation: refining the use of surveys

F. Muñoz and **R. Almanza** 927 A survey of solar pond developments

B. K. Bala and **M. M. Hossain** 939 Economics of biogas digesters in Bangladesh

K. Nilsson and **M. Söderström** 945 Optimizing the operating strategy of a pulp and paper mill using the MIND method

G. N. Tiwari, S. K. Singh, and **Kailash Thakur** 955 Design criteria for an active biogas plant

R. K. Maikhuri 959 Eco-energetic analysis of animal husbandry in traditional societies of India

Peter M. Miller, Howard S. Geller, and **Anibal T. de Almeida** 969 An example of energy savings in LDCs: improving electrical equipment in Pakistan

Gwo-Hshiung Tzeng, Tzay-an Shiau, and **Chien-Yuan Lin** 983 Application of multicriteria decision making to the evaluation of new energy system development in Taiwan

Note

V. C. Sharma and **A. Sharma** 993 Voltaic cell activities of tree-crops and fruits

NUMBER 11

N. W. Lanfredi, J. L. Pousa, C. A. Mazio, and **W. C. Dragani** 997 Wave-power potential along the coast of the Province of Buenos Aires, Argentina

D. Khummongkol, B. Saniam, and **V. Phimolmas** 1007 Removal of dust by impingement of gas on a water surface

A. Tamimi and **Z. Kodah** 1013 Energy consumption in Jordan

M. V. Sorin and **V. M. Brodyansky** 1019 A method for thermodynamic optimization—I. Theory and application to an ammonia-synthesis plant

M. V. Sorin and **P. Le Goff** 1033 A method for thermodynamic optimization—II. Application to an absorption heat pump and generalization of the method

M. A. Habib, A. M. Mobarak, A. M. Attya, and **A. Z. Aly** 1049 An experimental investigation of heat-transfer and flow in channels with streamwise-periodic flow

E. D. Rogdakis 1059 Nomographs for H_2O–LiBr absorption-panel cooling systems

Ashok Kumar and **J. D. Anand** 1067 Modelling and performance of a tubular multiwick solar still

Edward L. Vine 1073 Persistence of energy savings: what do we know and how can it be ensured?

Todd M. Johnson 1085 China's power industry, 1980–1990: price reform and its effect on energy efficiency

Sheldon X. C. Lou, C. W. Kenneth Keng, Jiong Jiang, and **Feng Cheng** 1093 Time of use (TOU) rate effect using the pattern clustering method

Note

Manoel Gonçalves Rodrigues 1105 The use of pipelined fuel gas in Rio de Janeiro

NUMBER 12

R. Rubin, R. Levitan, H. Rosin, and **M. Levy** 1109 Methanation of synthesis gas in a solar chemical heat pipe

Mark D. Levine, Jayant A. Sathaye, Paul P. Craig, and **Stephen C. Peck** 1121 Strategies for addressing climate change: policy perspectives from around the world

John Gusdorf 1137 Energy paybacks and renewable breeders

Jong Chan Choi and **Sang Done Kim** 1153 Heat-transfer characteristics of a latent heat storage system using $MgCl_2 \cdot 6H_2O$

A. I. Alkhamis and **S. A. Sherif** 1165 Performance analysis of a solar-assisted swimming pool heating system

Chih Wu and **Robert L. Kiang** 1173 Finite-time thermodynamic analysis of a Carnot engine with internal irreversibility

Carsten Oder, Hans-Dietrich Haasis, and **Otto Rentz**	1179	Analysis of the Lithuanian final energy consumption with respect to economic changes
Gil Ingel, Moshe Levy, and **J. M. Gordon**	1189	Oil-shale gasification by concentrated sunlight: an open-loop solar chemical heat pipe
Chien-Ming Shen and **W. M. Worek**	1199	The effect of wall conduction on the performance of regenerative heat exchangers
S. C. Saxena, R. Z. Qian, and **D. C. Liu**	1215	Recent Chinese heat-transfer research on bubbling and circulating fluidized beds
Anupa Guha Majumdar, Asok K. Jana, and **Benoy B. Bhowmik**	1233	Solar cells consisting of phenazine dyes in polymer matrix
Ho-Ming Yeh and **Zhi-Fang Chen**	1239	Energy balances in wick-type double-effect solar distillers with air flow through the second-effect unit
Dileep K. Jain and **Jean Claude Mora**	1249	Cogeneration potential in the Indian pulp and paper industries
D. B. Waddle and **R. D. Perlack**	1255	Financing and disseminating small energy systems in rural areas
